Highly accomplished **Angular Developer** with over 4 years of experience delivering scalable, high-performing web and mobile applications across diverse industries. Expert in designing intuitive user interfaces and seamlessly integrating robust backend systems to meet complex business needs. Proficient in modern frameworks like Angular and Node.js, with demonstrated leadership in guiding development teams, driving innovation, and ensuring timely project delivery. Passionate about leveraging cutting-edge technologies to optimize application performance and achieve organizational success.

Professional Experience

Senior Angular Developer (Contractor)

Luxsh Solutions • Remote • India

2022 – Present

- Spearheaded the development of cutting-edge applications under Luxsh Technologies, delivering scalable and secure software solutions.
- Led the design and implementation of the **Contract Management System (CMS)**, streamlining contract workflows for enterprise clients.
- Engineered a precision **E-Signature solution**, leveraging advanced PDF manipulation and integration for a seamless user experience.
- Delivered high-impact solutions for the **Stock Acceptance Tool (SAT)**, optimizing stock validation processes and reducing turnaround time.
- Contributed to the development of an AI-powered **HRMS**, integrating GPT APIs for enhanced applicant tracking and resume analysis.
- Mentored junior developers, ensuring adherence to best practices and on-time project delivery.

Software Engineer

Idea Elan • Remote • India

2022 – Present

- Played a pivotal role in developing a sophisticated Angular application used by top-tier research universities for scientific instrument scheduling.
- Developed a custom **AI chatbot** using Node.js and Socket.IO for real-time user interaction.
- Successfully implemented complex UX designs, enhancing user engagement and overall system usability.
- Acted as a technical lead for customer-specific enhancements, delivering tailored solutions to meet unique client requirements.

Front-End Development Lead (Contractor)

Stag.ai LTD • Freelance • London

2023 – Present

- Managed a team of four UI engineers to deliver high-quality web applications in collaboration with the UX team.
 - Delivered multiple websites with cutting-edge designs and responsive interfaces.
 - Conducted regular code reviews, ensuring consistency, quality, and adherence to industry standards.
 - Designed and implemented a user-friendly **HR management platform**, integrating real-time employee tracking and performance analytics.
 - Led the integration of advanced dashboards, significantly enhancing data visualization and reporting capabilities.
-

Freelance Projects

- **Contract Management System:** Enhanced contract workflows through a feature-rich Angular application.

- **E-Signature Platform:** Built a secure and scalable e-signature application for enterprise users.
 - **HRMS with GPT Integration:** Developed AI-powered recruitment tools for resume parsing and applicant evaluation.
 - **Scientific Scheduling Tool:** Designed an Angular-based tool for research universities, streamlining complex scheduling and invoicing workflows.
-

Certifications

- **Server-Side Development with Node.js, Express, and MongoDB** (Coursera)
 - **Front-End JavaScript Frameworks: Angular** (Coursera)
 - **HTML, CSS, and JavaScript for Web Developers** (Johns Hopkins University)
 - **Database Management System** (NPTEL, IIT Kharagpur)
 - **Cloud Computing** (NPTEL, IIT Kharagpur)
-

Achievements

- Successfully mentored and managed multiple development teams, achieving 100% on-time project delivery.
 - Recognized for innovative contributions to real-time communication features and AI integrations.
 - Achieved consistent client satisfaction by delivering tailored solutions that met and exceeded expectations.
-

Education

Bachelor of Computer Application (BCA): Santhigiri College of Computer Sciences, MG University

Technical Skills

Programming Languages	TypeScript, JavaScript (ES6+), Python, HTML, SCSS
Frameworks	Angular, Node.js, Express.js, Capacitor, Ionic, Astro
Tools & Platforms	Git, Docker, Azure, GitHub Actions
Database Management	MongoDB, MySQL
DevOps	CI/CD pipelines, Azure DevOps
AI & LLM Integration	OpenAI, Custom chatbot development
Real-Time Features	WebSocket, Socket.IO
UX/UI Design	Responsive Design, UX Implementation
